

HPE FlexFabric 5820 Switch Series

Key features

- For enterprise edge, or distribution/data center
- Up to 24 ports of 10GbE per unit/194 per stack
- Flex chassis—modular resiliency
- Cut-through switching for very low latency
- Hot-swappable I/O, power supplies, and fans

Product overview

HPE FlexFabric 5820 Switch Series supports advanced features that deliver a unique combination of unmatched 10 Gigabit Ethernet; high-availability architecture; full Layer 2/3 dual-stack IPv4/IPv6; and line-rate, low-latency

performance on all ports. Extensible embedded application capabilities enable these switches to integrate services into the network, consolidating devices and appliances to simplify deployment and reduce power consumption as well as rackspace.

Extremely versatile, the switches can be used in high-performance, high-density building or department cores as part of a consolidated network; for **data center top-of-rack server** access; or as high-performance Layer 3, 10GbE aggregation switches in campus and data center networks.

Features and benefits

Quality of service (QoS)

- Powerful QoS feature

Creates traffic classes based on access control lists (ACLs), IEEE 802.1p precedence, IP, and DSCP or Type of Service (ToS) precedence; supports filter, redirect, mirror, or remark; supports congestion actions such as: strict priority (SP) queuing, weighted round robin (WRR), weighted fair queuing (WFQ), weighted random early discard (WRED), weighted deficit round robin (WDRR), and SP+WDRR

- Integrated network services

Extends and integrates application capability into the network, with support for open application architecture (OAA) modules ring resiliency protection protocol (RRPP)

- Provides fast recovery for ring

Ethernet-based topology; helps facilitate consistent application performance for applications such as VoIP

Management

- Remote configuration and management

Enables configuration and management through a secure web browser or a CLI located on a remote device

- IEEE 802.1ab LLDP discovery

Advertises and receives management information from adjacent devices on a network, facilitating easy mapping by network management applications

- USB support

- File copy

Allows users to copy switch files to and from a USB flash drive

- DHCP options

Provides server (RFC 2131), client, snooping, and relay options

- SNMPv1, v2c, and v3

Facilitates centralized discovery, monitoring, and secure management of networking devices

- sFlow®

Provides scalable ASIC-based network monitoring and accounting; this allows network operators to gather a variety of sophisticated network statistics and information for capacity planning and real-time network monitoring purposes

- Network Time Protocol (NTP)

Synchronizes timekeeping among distributed time servers and clients; keeps timekeeping consistent among all clock-dependent devices within the network so that the devices can provide diverse applications based on the consistent time

Connectivity

- High-density port connectivity
194 10GbE ports with a 40 Gbps resilient backplane
- Auto-MDIX
Provides automatic adjustments for straight-through or crossover cables on all 10/100 and 10/100/1000 ports
- Jumbo frames
On Gigabit Ethernet and 10 Gigabit Ethernet ports, jumbo frames allow high-performance remote backup and disaster-recovery services
- IPv6 native support
 - IPv6 host
Enables switches to be managed and deployed at the IPv6 network’s edge
 - Dual stack (IPv4/IPv6)
Transitions from IPv4 to IPv6, supporting connectivity for both protocols
 - MLD Snooping
Forwards IPv6 multicast traffic to the appropriate interface
 - IPv6 ACL/QoS
Supports ACL and QoS for IPv6 network traffic, preventing traffic flooding
 - IPv6 routing
Supports IPv6 static routes and IPv6 versions of RIP, OSPF, IS-IS, and Border Gateway Protocol (BGP) routing protocols

Performance

- Hardware-based wire-speed access control lists (ACLs)
Helps provide high levels of security and ease of administration without impacting network performance with a feature-rich TCAM-based ACL implementation
- Unique versatile architecture
Supports the best of both, fixed-port and modular configurations
- Cut-through switching
Delivers wire-speed, line-rate performance on all ports, as well as cut-through switching for low latency

Resiliency and high availability

- Data center-optimized design
The FlexFabric 5820AF-24XG Switch (JG219A) supports front-to-back and back-to-front airflow for hot or cold aisles, rear rackmounts, and redundant hot-swappable AC or DC power and fans

Manageability

- Full-featured console
Provides complete control of the switch with a familiar CLI
- Web interface
Allows configuration of the switch from any web browser on the network
- RMON and sFlow
Provides advanced monitoring and reporting capabilities for statistics, history, alarms, and events
- Multiple configuration files
Allows multiple configuration files to be stored to a flash image
- Troubleshooting
 - Ingress and egress port monitoring enable network problem solving
 - Traceroute and ping enable testing of network connectivity
 - Virtual cable tests provide visibility to cable problems

Layer 2 switching

- 32K MAC addresses
Provides access to many Layer 2 devices
- 4,094 port-based VLANs
Provides security between workgroups
- IEEE 802.1ad QinQ and selective QinQ
Increases the scalability of an Ethernet network by providing a hierarchical structure; connects multiple LANs on a high-speed campus or metro network

- Gigabit Ethernet port aggregation
Allows grouping of ports to increase overall data throughput to a remote device
- 10GbE port aggregation
Allows grouping of ports to increase overall data throughput to a remote device
- Spanning Tree/MSTP, RSTP, and STP root guard
Prevents network loops
- sFlow
Allows traffic sampling
- GVRP VLAN Registration Protocol
Allows automatic learning and dynamic assignment of VLANs

Layer 3 services

- Address resolution protocol (ARP)
Determines the MAC address of another IP host in the same subnet; supports static ARPs; gratuitous ARP allows detection of duplicate IP addresses; proxy ARP allows normal ARP operation between subnets or when subnets are separated by a Layer 2 network
- Dynamic host configuration protocol (DHCP)
Simplifies the management of large IP networks and supports client and server; DHCP Relay enables DHCP operation across subnets

Layer 3 routing

- Layer 3 IPv4 routing
 - Provides routing of IPv4 at media speed; supports static routes, RIP and RIPv2, OSPF, IS-IS, and BGP
- Routing Information Protocol (RIP) and RIPng support
 - Provides complete support of RIP for both IPv4 and IPv6
- OSPF and OSPFv3 support
 - Provides complete support of OSPF for both IPv4 and IPv6
- IS-IS and IS-ISv6 support
 - Provides complete support of IS-IS for both IPv4 and IPv6
- Layer 3 IPv6 routing
 - Provides routing of IPv6 at media speed; supports static routes, RIPng, OSPFv3, IS-ISv6, and BGP4+
- Bidirectional forwarding detection (BFD)
 - Enables link connectivity monitoring and reduces network convergence time for RIP, OSPF, BGP, IS-IS, VRRP, MPLS, and IRF
- Virtual Router Redundancy Protocol (VRRP) and VRRP Extended
 - Allows quick failover of router ports
- Policy-based routing
 - Makes routing decisions based on policies set by the network administrator
- IGMPv1, v2, and v3
 - Allows individual hosts to be registered on a particular VLAN

- PIM-SSM, PIM-DM, and PIM-SM (for IPv4 and IPv6)
 - Support IP multicast address management and inhibition of DoS attacks
- Equal-Cost Multipath (ECMP)
 - Enables multiple equal-cost links in a routing environment to increase link redundancy and scale bandwidth

Security

- Defense in-depth security
 - Provides integrated and distributed security enforcement that can be managed from a central location, such as the **HPE Intelligent Management Center (IMC)**
- Advanced processor queuing mechanism
 - Helps prevent denial-of-service (DoS) attacks, while DHCP snooping helps enable that devices can only receive an IP address from a legitimate DHCP server on the network
- RADIUS/HWTACACS
 - Eases switch management security administration by using a password authentication server

- Secure Shell (SSHv2)
Encrypts all transmitted data for secure, remote CLI access over IP networks
- IEEE 802.1X-based dynamic delivery of QoS, ACLs, and VLANs
Allows complete control over user network access
- Guest VLAN
Provides a browser-based environment to authenticated clients that is similar to IEEE 802.1X
- Port isolation
Secures and adds privacy, and prevents malicious attackers from obtaining user information
- Port security
Allows access only to specified MAC addresses, which can be learned or specified by the administrator
- MAC-based authentication
Allows or denies access to the switch based on a client MAC address
- IP source guard
Helps prevent IP spoofing attacks
- HTTPS management
Provides secure web management
- Unicast Reverse Path Forwarding (URPF)
Limits malicious traffic on a network
- Multi-Customer Edge (MCE)—Multicast Virtual Routing and Forwarding (MVRF)
Provides MPLS edge router support
- Public key infrastructure (PKI)
Is used to control access

Convergence

- Voice VLAN
Automatically assigns VLAN and priority for IP phones, simplifying network configuration and maintenance
- LLDP-MED
Is a standard extension that automatically configures network devices, including LLDP-capable IP phones
- Internet Group Management Protocol (IGMP)
Utilizes Any-Source Multicast (ASM) or Source-Specific Multicast (SSM) to manage IPv4 multicast networks; supports IGMPv1, v2, and v3
- Protocol Independent Multicast (PIM)
Defines modes of Internet multicasting to allow one-to-many and many-to-many transmission of information; supports PIM Dense Mode (DM), Sparse Mode (SM), and Source-Specific Mode (SSM)

Monitor and diagnostics

- Port mirroring

Enables traffic on a port to be simultaneously sent to a network analyzer for monitoring
- OAM (IEEE 802.3ah)

Operations, administration, and maintenance (OAM) management capability detects data link layer problems that occur in the “last mile”; monitors the status of the link between the two devices
- CFD (IEEE 802.1ag)

Connectivity fault detection (CFD) provides a Layer 2 link OAM mechanism used for link connectivity detection and fault locating

Additional information

- HPE Intelligent Resilient Framework (IRF)
 - Creates virtual resilient switching fabrics, where two or more switches perform as a single Layer 2 switch and Layer 3 router
 - Does not require switches to be co-located and allows them to be part of a disaster-recovery system
 - Allows servers or switches to be attached using standard LACP for automatic load balancing and high availability
 - Simplifies network operation by helping eliminate the complexity of Spanning Tree Protocol, ECMP, or VRRP
- OAA modules

Supports wireless network management and high-performance security applications; leverages network infrastructure investment
- Green IT and power

Improves energy efficiency through the use of the latest advances in silicon development; shuts off unused ports and utilizes variable-speed fans, reducing energy costs

- High scalability with IRF

HPE Intelligent Resilient Framework (IRF) technology simplifies the architecture of server access networks; up to nine FlexFabric 5820/5820AF stackable switches can be combined to deliver unmatched scalability of virtualized access layer switches and flatter, two-tier HPE FlexFabric networks using IRF, which reduces cost and complexity

Warranty and support

- 1-year warranty

Advance hardware replacement with 10-calendar day delivery (available in most countries)
- Electronic and telephone support

Limited electronic and business-hours telephone support is available from HPE for the entire warranty period; to reach our support centers, refer to hpe.com/networking/contact-support; for details on the duration of support provided with your product purchase, refer to hpe.com/networking/warrantysummary
- Software releases

To find software for your product, refer to hpe.com/networking/support; for details on the software releases available with your product purchase, refer to hpe.com/networking/warrantysummary

HPE FlexFabric 5820 Switch Series

Specifications

HPE FlexFabric 5820-24XG-SFP+ Switch (JC102B)

HPE FlexFabric 5820AF-24XG Switch (JG219B)

I/O ports and slots	<p>24 SFP+ 10GbE ports; Duplex: full only</p> <p>4 RJ-45 auto-negotiating</p> <p>10/100/1000 ports (IEEE 802.3 Type 10BASE-T, IEEE 802.3u Type 100BASE-TX, IEEE 802.3ab Type 1000BASE-T)</p> <p>Supports a maximum of 24 SFP+ ports plus 4 autosensing 10/100/1000 ports</p>	<p>24 fixed 1000/10000 SFP+ ports</p> <p>2 RJ-45 autosensing</p> <p>10/100/1000 ports (IEEE 802.3 Type 10BASE-T, IEEE 802.3u Type 100BASE-TX, IEEE 802.3ab Type 1000BASE-T); Duplex: 10BASE-T/100BASE-TX: half or full; 1000BASE-T: full only</p>
Additional ports and slots	<p>1 RJ-45 serial console port</p>	<p>1 RJ-45 serial console port</p> <p>1 RJ-45 out-of-band management port</p> <p>1 USB 2.0</p>
Power supplies	<p>2 power supply slots</p> <p>1 minimum power supply required (ordered separately)</p>	<p>2 power supply slots</p> <p>1 minimum power supply required (ordered separately)</p>
Fan tray	<p>Includes: 1 x JC098A</p> <p>1 fan tray slot</p> <p>Base product includes fan tray</p>	<p>2 fan tray slots</p> <p>The customer must order fan trays, as fan trays are not included with the switch. This system requires two same-direction airflow fan trays to function properly. The system should not be operated with only one fan tray for more than 24 hours. The system should not be operated without a fan tray more than two minutes. The system should not be operated outside of the temperature range of 32°F (0°C) to 113°F (45°C). Failure to comply with these operating requirements may void the product warranty.</p>
Physical characteristics		
Dimensions	17.32(w) x 16.81(d) x 1.73(h) in. (44.0 x 42.7 x 4.4 cm) (1U height)	25.98(w) x 17.32(d) x 1.72(h) in. (65.99 x 43.99 x 4.37 cm) (1U height)
Weight	18.74 lb (8.5 kg)	22.05 lb (10 kg) shipping weight

HPE FlexFabric 5820 Switch Series (continued)

	HPE FlexFabric 5820-24XG-SFP+ Switch (JC102B)	HPE FlexFabric 5820AF-24XG Switch (JG219B)
Memory and processor	2048 MB SDRAM, 512 MB flash; packet buffer size: 2 MB	2048 MB flash, 512 MB SDRAM; packet buffer size: 2 MB
Performance		
Latency	2.02 μ s (cut through), 2.02 μ s (store and forward) (64-byte packets)	3 μ s (64-byte packets)
Throughput	Up to 363 million pps (64-byte packets)	360 million pps
Routing/Switching capacity	488 Gbps	484 Gbps
Routing table size	12000 entries (IPv4)	12000 entries (IPv4)
MAC address table size	32000 entries	32000 entries
Environment		
Operating temperature	32°F to 113°F (0°C to 45°C)	32°F to 113°F (0°C to 45°C)
Operating relative humidity	10% to 90%, noncondensing	10% to 90%, noncondensing
Acoustic	Low-speed fan: 48.4 dB, High-speed fan: 59.7 dB	Low-speed fan: 60.1 dB, High-speed fan: 69.9 dB
Electrical characteristics		
Frequency	50/60 Hz	50/60 Hz
Maximum heat dissipation	631 BTU/hr (665.71 kJ/hr)	607 BTU/hr (640.39 kJ/hr)
AC voltage	100–120/200–240 VAC	100–120/200–240 VAC
DC voltage	-48 to -60 VDC	-48 to -60 VDC
Maximum power rating	300W	650W
Notes	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.
