The frequency presets within any one frequency bank are intermodulation-free. These frequencies cannot be changed.

The frequency bank "U" allows the user to store individual frequencies which are freely selectable in 25-kHz steps. Therefore these frequencies may not be intermodulation-free.

From 01 January 2013 in the UK, only 863 MHz - 865 MHz will be available. For more details contact www.pmse.co.uk

Licences and licensing information can be obtained in the UK via Arqiva at www.pmse.co.uk
